Mr. Jerry Glazier  
5M. Inc.  
P.O. Box 752  
Hurricane, Utah 84737

Dear Mr. Glazier:

Re: Reclamation Plan, Silver Reef Mine, M/053/002, Washington  
County, Utah

Thank you for the Silver Reef Reclamation Plan which was given to Holland Shepherd and Frank Filas of my staff on March 31, 1988. The interim clean up measures proposed in Section b are approved. An extension for completion of Items 7, 20, 24, and 25 is hereby granted. This work is to be completed by July 1, 1988.

The Division will not require a deadline for the clean up of the old mill (Item 21). This area is prelaw and is not under our jurisdiction. We do, however, commend you for the work which has been done at the old mill site and hope that you will complete the clean up of this area.

As Frank Filas indicated on site, we will require that you submit a plan for final reclamation of the site. Some portions of the mine site such as roads, buildings, and power lines may not have to be included in the final reclamation if they have a continuing use after mining is completed.

The petition for reassignment of the forfeited bond is not in the proper form for presentation to the Board. I believe that you have since received the information necessary for reformatting this petition. Lawyer representation will be necessary at the Board meeting. I also recommend that you cover in more detail the agreements between 5M and Kerley which you make mention of in the fourth paragraph of the petition.

Submittal of the final reclamation plan should be made by April 18, 1988. If this deadline cannot be met, the Division must receive prior notification justifying the need for the extension. The formal petition for bond reassignment can be made once the final reclamation plan has been submitted and tentatively approved by the Division.

Thank you for your cooperation.

Sincerely,

Lowell P. Braxton  
Administrator, Mineral Resource  
Development and Reclamation Program
